

Barksdale Student News!

Summer 2008

Chad Shelton, a Spring 2008 Industrial Technology (IT) graduate, was recently promoted to the position of Field Engineer with Gulf States, Inc. (GSI). Chad separated from the military in Fall 2007 and was hired by GSI as a Field Engineering intern while completing the last requirements for his bachelor's degree in Industrial Technology – a program he started while stationed at Barksdale AFB, LA. Even though Chad moved to south Texas before finishing all his requirements for the IT degree, he was able to complete his last semester of coursework because of the alternate weekend and independent study format. **Once he completed his BS degree with SIU in May 2008, he was promoted from intern to a full-time Field Engineering position with Gulf States, Inc.**

Congratulations Chad!
