

Beginning on Page 43 Problem 2.6 A production line is to run at 1000 units per month. Sales are forecast as shown. Calculate the period ending inventory. Opening inventory is 500. All periods have the same number of working days.

| Week | 1 | 2 | 3 | 4 | 5 | 6 |
|--------------------|------|------|------|------|------|------|
| Forecast | 700 | 700 | 1100 | 1600 | 1100 | 800 |
| Planned Production | 1000 | 1000 | 1000 | 1000 | 1000 | 1000 |
| Planned Inventory | 500 | | | | | |
| | | | | | | |

Problem 2.7 A company wants to develop a level production plan for a family of products. The opening inventory is 100 units and an increase to 160 units is expected by the end of the plan. Demand is as follows. How much should be produced each period and what is the ending inventories for each period?

| Week | 1 | 2 | 3 | 4 | 5 | 6 | Total |
|--------------------|-----|-----|-----|-----|-----|-----|-------|
| Forecast | 100 | 120 | 130 | 140 | 120 | 110 | |
| Planned Production | | | | | | | |
| Planned Inventory | 100 | | | | | | |
| | | | | | | | |

Problem 2.8 A company wants to develop a level production plan for a family of products. The opening inventory is 500 units and a decrease to 300 units is expected by the end of the plan. Demand is as follows. How much should be produced each period and what is the ending inventory for each period? Do you see a problem with the plan?

| Week | 1 | 2 | 3 | 4 | 5 | 6 | Total |
|--------------------|------|------|-----|-----|-----|------|-------|
| Forecast | 1200 | 1200 | 800 | 600 | 800 | 1000 | |
| Planned Production | | | | | | | |
| Planned Inventory | 500 | | | | | | |
| | | | | | | | |

Problem 2.9 A company wants to develop a level production plan. The opening inventory is zero (0) units. (a) What production rate will give a zero inventory at the end of period 4? (b) When and in what quantities will back orders occur? (c) What level of production rate per period will avoid back orders? (d) What is the ending inventory for period 4?

| Week | 1 | 2 | 3 | 4 | Total |
|--------------------|---|---|---|---|-------|
| Forecast | 9 | 5 | 9 | 9 | |
| Planned Production | | | | | |
| Planned Inventory | 0 | | | | |
| | | | | | |

Problem 2.11 A company wants to develop a level production plan for a family of products. The opening inventory is 100 units and an increase to 130 is expected by the end of the

plan. Calculate the total production, daily production, and production and ending inventory for each month.

| Month | May | Jun | Jul | Aug | Total |
|--------------------|-----|-----|-----|-----|-------|
| Working Days | 21 | 19 | 20 | 10 | |
| Forecast | 115 | 125 | 140 | 150 | |
| Planned Production | | | | | |
| Planned Inventory | 100 | | | | |
| | | | | | |

Problem 2.12 A company wants to develop a level production plan for a family of products. The opening inventory is 600 units and a decrease to 200 units is expected by the end of the plan. How much should the company produce each month? What will be the ending inventory in each month? Do you see any problems?

| Month | Jan | Feb | Mar | Apr | May | Jun | Total |
|--------------------|------|------|-----|-----|-----|-----|-------|
| Working Days | 20 | 22 | 20 | 20 | 18 | 19 | |
| Forecast | 1200 | 1300 | 800 | 700 | 700 | 900 | |
| Planned Production | | | | | | | |
| Planned Inventory | 600 | | | | | | |

Problem 2.13 Because of its labor contract a company must hire enough labor for 100 units of production per week on one shift or 200 units per week on two shifts. They cannot hire, lay off, or work overtime. During the fourth week, workers will be available from another department to work part or all of an extra shift (up to 100 units) There is a planned shutdown for maintenance in the second week, which will cut production to half. Develop a production plan. The opening inventory is 200 units, and the desired ending inventory is 300 units.

| Week | 1 | 2 | 3 | 4 | 5 | 6 | Total |
|--------------------|-----|-----|-----|-----|-----|-----|-------|
| Forecast Demand | 120 | 160 | 240 | 240 | 160 | 160 | |
| Planned Production | | | | | | | |
| Planned Inventory | 200 | | | | | | |

Problem 2.15 The opening backlog is 900 units. Forecast demand is shown, develop a level production plan if the backlog is to be reduced to 200 units.

| Week | 1 | 2 | 3 | 4 | 5 | 6 | Total |
|--------------------|-----|-----|-----|-----|-----|-----|-------|
| Forecast Demand | 600 | 700 | 700 | 700 | 600 | 500 | |
| Planned Production | | | | | | | |
| Projected Backlog | 900 | | | | | | |
| | | | | | | | |

Problem 2.16 The opening backlog is 1100 units. Calculate the weekly production for level production if the backlog is to be increased to 1200 units.

| Week | 1 | 2 | 3 | 4 | 5 | 6 | Total |
|------|---|---|---|---|---|---|-------|
| | | | | | | | |

| | | | | | | | |
|--------------------|------|------|------|------|------|------|--|
| Forecast Demand | 1200 | 1100 | 1200 | 1200 | 1100 | 1000 | |
| Planned Production | | | | | | | |
| Projected Backlog | 1000 | | | | | | |
| | | | | | | | |

Problem 2.17 Calculate the number of workers required for level production. Each worker can produce 14 units per day. The desired inventory is 9000 units.

| | | | | | |
|--------------------|-------|-------|-------|-------|-------|
| Month | 1 | 2 | 3 | 4 | Total |
| Working Days | 20 | 24 | 12 | 19 | |
| Forecast | 28000 | 27500 | 28500 | 28500 | |
| Planned Production | | | | | |
| Planned Inventory | 11500 | | | | |
| | | | | | |

Problem 2.18 Calculate the number of workers required for level production. Each worker can produce 9 units per day. The desired inventory is 800 units. Why is it not possible to exactly reach the ending inventory?

| | | | | | | | |
|--------------------|------|------|------|------|------|------|-------|
| Month | 1 | 2 | 3 | 4 | 5 | 6 | Total |
| Working Days | 20 | 24 | 12 | 22 | 20 | 19 | |
| Forecast | 2800 | 3000 | 2700 | 3300 | 2900 | 3200 | |
| Planned Production | | | | | | | |
| Planned Inventory | 1000 | | | | | | |
| | | | | | | | |

Beginning on Page 67 Problem 3.1 The Wicked Witch Whisk Company manufactures a line of broomsticks. The most popular is the 36-inch model, and the sales department has prepared a forecast for six weeks. The opening inventory is 30. As master scheduler, you must prepare an MPS. The brooms are manufactured in lots of 100.

| | | | | | | | |
|---------------------|----|----|----|----|----|----|----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 |
| Forecast | | 10 | 50 | 25 | 50 | 10 | 15 |
| Projected Available | 30 | | | | | | |
| MPS | | | | | | | |

Problem 3.2 The Shades Sunglass Company assembles sunglasses from frames, which it makes, and lenses, which it purchases from an outside supplier. The sales department has prepared the following six-week forecast for Ebony, a popular mode. The sunglasses are assembled in lots of 200, and the opening inventory is 300 pairs. Complete the projected available balance and the master production schedule.

| | | | | | | | |
|---------------------|-----|-----|-----|-----|-----|-----|-----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 |
| Forecast | | 200 | 300 | 350 | 200 | 150 | 150 |
| Projected Available | 300 | | | | | | |
| MPS | | | | | | | |

Problem 3.3 Amalgamated Mailbox Company manufactures a family of two mailboxes. The production plan and the MPS are developed on a quarterly basis. The forecast for the product group follows. The opening inventory is 270 units, and the company wants to reduce this to 150 units at the end of the year. Develop a level production plan.

Production Plan

| | | | | | | |
|---------------------|-----|-----|-----|-----|-----|-------|
| Week | | 1 | 2 | 3 | 4 | Total |
| Forecast | | 220 | 300 | 200 | 200 | |
| Projected Available | 270 | | | | | |
| MPS | | | | | | |

Problem 3.3 continued on the next page.

The forecast sales for each of the mailboxes in the family also follow. Develop an MPS for each item, bearing in mind that production is to be leveled as in the production plan. For each mailbox, the lot size is 200.

Mailbox A. Lot size: 200

| Week | | 1 | 2 | 3 | 4 | Total |
|---------------------|-----|-----|-----|-----|-----|-------|
| Forecast | | 120 | 180 | 100 | 120 | |
| Projected Available | 120 | | | | | |
| MPS | | | | | | |

Mailbox B. Lot size: 200

| Week | | 1 | 2 | 3 | 4 | Total |
|---------------------|-----|-----|-----|-----|----|-------|
| Forecast | | 100 | 120 | 100 | 80 | |
| Projected Available | 150 | | | | | |
| MPS | | | | | | |

Problem 3.4 Worldwide Can-Openers, Inc. makes a family of two hand-operated can openers. The production plan is based on months. There are four weeks in this month. Opening inventory is 2000 dozen, and it is planned to increase that to 4000 dozen by the end of the month. The MPS is made using weekly periods. The forecast and projected available balance for the two models follow. The lot size for both models is 1000 dozen. Calculate the production plan and the MPS for each item.

Production Plan

| Week | | 1 | 2 | 3 | 4 | Total |
|---------------------|------|------|------|------|------|-------|
| Forecast | | 3000 | 3500 | 3500 | 4000 | |
| Projected Available | 2000 | | | | | |
| MPS | | | | | | |

Mailbox A. Lot size: 1000

| Week | | 1 | 2 | 3 | 4 | Total |
|---------------------|------|------|------|------|------|-------|
| Forecast | | 2000 | 2000 | 2500 | 2000 | |
| Projected Available | 1500 | | | | | |
| MPS | | | | | | |

Mailbox B. Lot size: 1000

| Week | | 1 | 2 | 3 | 4 | Total |
|---------------------|-----|------|------|------|------|-------|
| Forecast | | 1000 | 1500 | 1000 | 2000 | |
| Projected Available | 500 | | | | | |
| MPS | | | | | | |

Problem 3.6 The Acme Widget Company makes widgets in two models, and the bottle neck operation is in work center 10. Following is the resource bill (in hours per part).

Resource Bill

| Work Center | Hours per Part | |
|-------------|----------------|---------|
| | Model A | Model B |
| 10 | 2.5 | 3.3 |

The Master Production Schedule for the next five weeks is:

| Week | 1 | 2 | 3 | 4 | 5 |
|---------|----|----|----|----|----|
| Model A | 70 | 50 | 50 | 60 | 45 |
| Model B | 20 | 40 | 55 | 30 | 45 |

a) Using the resource bill and the master production schedule, calculate the number of hours required in work center 10 for each of the five weeks. Use the following table to record the required capacity on the work center.

Hours Required Based on Resource Bill

| Week | 1 | 2 | 3 | 4 | 5 |
|-------------|---|---|---|---|---|
| Model A | | | | | |
| Model B | | | | | |
| Total Hours | | | | | |

b) If the available capacity at work station 10 is 260 hours per week, suggest possible ways of meeting the demand in week 3.

Problem 3.7: Calculate the ATP using the following data. There are 100 units on hand

| Week | 1 | 2 | 3 | 4 | 5 | 6 |
|-----------------|----|----|-----|-----|----|-----|
| Customer Orders | 70 | 70 | 20 | 40 | 10 | |
| MPS | | | 100 | 100 | | 100 |
| ATP | | | | | | |

Problem 3.8 Given the following data, calculate the ATP.

| Week | 1 | 2 | 3 | 4 | 5 | 6 |
|-----------------|----|----|----|----|---|---|
| Customer Orders | 21 | | 14 | 9 | | 3 |
| MPS | | 30 | 30 | 30 | | |
| ATP | | | | | | |

Problem 3.9: Using the scheduled receipts, calculate the ATP. There are 0 units on hand.

| Week | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |
|-----------------|----|---|----|---|----|----|---|---|----|----|
| Customer Orders | 10 | | 10 | | 60 | 18 | | | 10 | |

| | | | | | | | | | | | |
|-----|--|----|--|--|--|----|--|--|--|----|--|
| MPS | | 50 | | | | 50 | | | | 50 | |
| ATP | | | | | | | | | | | |

Problem 3.10: Using the scheduled receipts, calculate the ATP. There are 45 units on hand.

| | | | | | | | | | |
|-----------------|--|----|-----|----|-----|----|-----|----|-----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Customer Orders | | 45 | 50 | 40 | 40 | 40 | 40 | 30 | 15 |
| MPS | | | 100 | | 100 | | 100 | | 100 |
| ATP | | | | | | | | | |

Problem 3.11: Using the following data to calculate the ATP. There are 60 units on hand.

| | | | | | | | |
|-----------------|--|----|-----|----|----|-----|----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 |
| Customer Orders | | 20 | 50 | 30 | 30 | 50 | 30 |
| MPS | | | 100 | | | 100 | |
| ATP | | | | | | | |

Problem 3.12: Given the data in problem 3.10, can an order for 20 for delivery in week 4 be accepted? Calculate the ATP using the following table.

| | | | | | | | | | |
|-----------------|--|----|-----|----|-----|----|-----|----|-----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Customer Orders | | 50 | 50 | 30 | 60 | 50 | 40 | 30 | 15 |
| MPS | | | 100 | | 100 | | 100 | | 100 |
| ATP | | | | | | | | | |

Problem 3.13: Given the following data, can an order for 30 more units for delivery in week 5 be accepted? If not, what do you suggest? Assume 50 units on hand.

| | | | | | | | | | |
|-----------------|--|-----|----|-----|----|----|-----|----|----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
| Customer Orders | | 70 | 10 | 50 | 40 | 10 | 15 | 20 | 50 |
| MPS | | 100 | | 100 | | | 100 | | |
| ATP | | | | | | | | | |

Problem 3.14: Given the following data, calculate the projected available balance and the planned MPS receipts. The order quantity is 200. The time fence is two weeks.

| | | | | | | |
|---------------------|-----|-----|----|----|----|--|
| Week | | 1 | 2 | 3 | 4 | |
| Forecast | | 80 | 80 | 80 | 70 | |
| Customer Orders | | 100 | 90 | 50 | 40 | |
| Projected Available | 140 | | | | | |
| MPS | | | | | | |

Problem 3.15: Given the following data, calculate the projected available balance and the planned MPS receipts. The order quantity is 100. The time fence is two weeks.

| | | | | | | |
|---------------------|----|----|----|----|----|--|
| Week | | 1 | 2 | 3 | 4 | |
| Forecast | | 50 | 50 | 50 | 50 | |
| Customer Orders | | 60 | 30 | 60 | 20 | |
| Projected Available | 60 | | | | | |
| MPS | | | | | | |

Problem 3.16: Complete the following problem. The lead time is one week and the time fence is week 3. The order quantity is 60, and there are 20 on hand.

| | | | | | | | |
|---------------------|--|----|----|----|----|----|----|
| Week | | 1 | 2 | 3 | 4 | 5 | 6 |
| Forecast | | 20 | 21 | 22 | 20 | 28 | 25 |
| Customer Orders | | 19 | 18 | 20 | 18 | 30 | 22 |
| Projected Available | | | | | | | |
| MPS | | | | | | | |
| ATP | | | | | | | |

Beginning on Page 107 Problem 4.3 Using the product tree in the text to determine the planned order receipts and planned order releases if 200 “A”s are to be produced in week 5.

| | WEEK | 1 | 2 | 3 | 4 | 5 | |
|-----------------------|-----------------------|---|---|---|---|---|--|
| Part A LT = 1 week | PLANNED ORDER RECEIPT | | | | | | |
| | PLANNED ORDER RELEASE | | | | | | |
| Part B LT = 1 week | PLANNED ORDER RECEIPT | | | | | | |
| | PLANNED ORDER RELEASE | | | | | | |
| Part C LT = 1 week | PLANNED ORDER RECEIPT | | | | | | |
| | PLANNED ORDER RELEASE | | | | | | |
| Part D LT = 1 week | PLANNED ORDER RECEIPT | | | | | | |
| | PLANNED ORDER RELEASE | | | | | | |
| Part E LT = 2 week | PLANNED ORDER RECEIPT | | | | | | |
| | PLANNED ORDER RELEASE | | | | | | |

Problem 4.4 Complete the following table. Lead time for the part is two weeks, and the order quantity is 40. What action should be taken?

| Week | 1 | 2 | 3 | 4 | |
|-----------------------|----|----|----|----|--|
| Gross Requirements | 10 | 15 | 10 | 20 | |
| Projected Available | 30 | | | | |
| Net Requirements | | | | | |
| Planned Order Receipt | | | | | |
| Planned Order Release | | | | | |

Problem 4.5 Given the product tree drawn in the text, explode, offset, and determine the gross and net requirements. All lead times are one week, and the quantities required are shown in ()'s. The master production schedule calls for 100 As to available in week 5. There are 20 Bs available.

| PART NUMBER | | WEEK | | | | |
|-------------|-----------------------|------|---|---|---|---|
| | | 1 | 2 | 3 | 4 | 5 |
| Part A | Gross requirements | | | | | |
| | Projected available | | | | | |
| | Net requirements | | | | | |
| | Planned order receipt | | | | | |
| | Planned order release | | | | | |
| Part B | Gross requirements | | | | | |
| | Projected available | | | | | |
| | Net requirements | | | | | |
| | Planned order receipt | | | | | |
| | Planned order release | | | | | |
| Part C | Gross requirements | | | | | |
| | Projected available | | | | | |
| | Net requirements | | | | | |
| | Planned order receipt | | | | | |
| | Planned order release | | | | | |
| Part D | Gross requirements | | | | | |
| | Projected available | | | | | |
| | Net requirements | | | | | |
| | Planned order receipt | | | | | |
| | Planned order release | | | | | |
| Part E | Gross requirements | | | | | |
| | Projected available | | | | | |
| | Net requirements | | | | | |
| | Planned order receipt | | | | | |
| | Planned order release | | | | | |
| Part F | Gross requirements | | | | | |
| | Projected available | | | | | |
| | Net requirements | | | | | |
| | Planned order receipt | | | | | |
| | Planned order release | | | | | |

Problem 4.6

Complete the following table. Lead time for the part is two weeks. The lot size is 100. What is the projected available at the end of week 3? When is it planned to release an order?

| Week | | 1 | 2 | 3 | 4 | |
|-----------------------|----|----|-----|----|----|--|
| Gross Requirements | | 20 | 65 | 40 | 25 | |
| Scheduled Receipts | | | 100 | | | |
| Projected Available | 40 | | | | | |
| Net Requirements | | | | | | |
| Planned Order Receipt | | | | | | |
| Planned Order Release | | | | | | |

Problem 4.7

Complete the following table. Lead time for the part is two weeks. The lot size is 50. What is the projected available at the end of week 3? When is it planned to release an order?

| Week | | 1 | 2 | 3 | 4 | |
|-----------------------|----|----|----|----|----|--|
| Gross Requirements | | 30 | 25 | 10 | 10 | |
| Scheduled Receipts | | 50 | | | | |
| Projected Available | 10 | | | | | |
| Net Requirements | | | | | | |
| Planned Order Receipt | | | | | | |
| Planned Order Release | | | | | | |

Problem 4.8 Given the following partial product tree (in text), explode, offset, and determine the gross and net requirements for components H, I, J, and K. There are other components, but they are not connected to this problem. The quantities required are shown in ()'s. The master production schedule calls for production of 50 Hs in week 3 and 80 in week 5. There is a scheduled receipt of 100 Is in week 2. There are 400 Js and 400 Ks available.

| PART NUMBER | | WEEK | | | | |
|-----------------------|---|------|---|---|---|---|
| | | 1 | 2 | 3 | 4 | 5 |
| Part H LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part I LT = 2 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part J LT = 1 week | Gross requirements Scheduled Receipts Projected available 400 Net requirements Planned order receipt Planned order release | | | | | |
| Part K LT = 1 week | Gross requirements Scheduled Receipts Projected available 400 Net requirements Planned order receipt Planned order release | | | | | |

Problem 4.9 MPS parent X has planned order releases of 30 in weeks 2 and 4. Given the following product tree, complete the MRP records for parts Y and Z.

| Part Y LT = 2 weeks Lot Size: 50 | WEEK | | | |
|--|------|---|---|---|
| | 1 | 2 | 3 | 4 |
| Gross requirements | | | | |
| Scheduled Receipts | | | | |
| Projected available 30 | | | | |
| Net requirements | | | | |
| Planned order receipt | | | | |
| Planned order release | | | | |

| Part Z LT = 1 week Lot Size: 100 | WEEK | | | |
|--|------|---|---|---|
| | 1 | 2 | 3 | 4 |
| Gross requirements | | | | |
| Scheduled Receipts | | | | |
| Projected available 20 | | | | |
| Net requirements | | | | |
| Planned order receipt | | | | |
| Planned order release | | | | |

Problem 4.10 Given the product tree (in text), explode, offset, and determine the gross and net requirements. The master production schedule calls for production of 100 As in week 5. There is a scheduled receipt of 100 Bs in week 1. There are 200 Fs available. Order quantities are lot for lot.

| | WEEK | 1 | 2 | 3 | 4 | 5 |
|-----------------------|---|---|---|---|---|---|
| Part A LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part B LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part C LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part D LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part E LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| Part F LT = 1 week | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |

Problem 4.11 Using the product tree in the text, complete the MRP records for parts X, Y, and Z. Note the specified order quantities for parts X and Y.

| | WEEK | 1 | 2 | 3 | 4 | 5 |
|---|--|----------|----|----|----|----|
| Part X LT = 1 week Lot Size: 20 | Gross requirements Scheduled Receipts Projected available 10 Net requirements Planned order receipt Planned order release | 15 20 | 5 | 15 | 10 | 15 |
| Part Y LT = 2 weeks Lot Size: 50 | Gross requirements Scheduled Receipts Projected available 30 Net requirements Planned order receipt Planned order release | | 50 | | | |
| Part Z LT = 2 weeks Lot Size: LFL | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | 90 | | | |
| Part W LT = 1 week Lot Size: 400 | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |

Problem 4.14 Use the product tree in the text to develop the MRP for these components.

| Code | | WEEK | 1 | 2 | 3 | 4 | 5 |
|------|---|---|-----|-----|----|-----|----|
| 0 | Part A LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | 60 | | 70 |
| 0 | Part F LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | 100 | |
| | Part B LT = 2 weeks Lot Size: 300 | Gross requirements Scheduled Receipts Projected available 200 Net requirements Planned order receipt Planned order release | | | | | |
| | Part C LT = 2 weeks Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | 120 | | | |
| | Part D LT = 2 weeks Lot Size: 300 | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | 300 | | | | |
| | Part E LT = 3 weeks Lot Size: 500 | Gross requirements Scheduled Receipts Projected available 400 Net requirements Planned order receipt Planned order release | | | | | |

Problem 4.15 Given the product tree (in text), explode, offset, and determine the gross and net requirements. All lead times are one week and the quantities required are shown in ()'s. The master production schedule calls for production of 100 As in week 4 and 50 in week 5. There is a scheduled receipt of 300 Bs in week 1 and 200 Ds in week 3. There are also 20 As available.

| Code | | WEEK | 1 | 2 | 3 | 4 | 5 |
|------|--------------------------------------|--|---|---|---|---|---|
| | Part A LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available 20 Net requirements Planned order receipt Planned order release | | | | | |
| | Part B LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part C LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part D LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part E LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |

Problem 4.16

| Code | | WEEK | 1 | 2 | 3 | 4 | 5 |
|------|--|---|---|---|---|---|---|
| | Part A LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part B LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part C LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part D LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part E LT = 1 week Lot Size: 500 | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |
| | Part F LT = 1 week Lot-for-Lot | Gross requirements Scheduled Receipts Projected available Net requirements Planned order receipt Planned order release | | | | | |

Problem 4.17: Complete the following MRP record. Lead Time is four weeks and the Lot Size is 200. What will happen if the gross requirements in week 3 are increased to 150 units? As a planner what actions can you take?

Initial MRP

| Week | 1 | 2 | 3 | 4 | 5 |
|-----------------------|-----|-----|-----|-----|----|
| Gross Requirements | 50 | 125 | 100 | 60 | 40 |
| Scheduled Receipts | | 200 | | 200 | |
| Projected Available | 100 | | | | |
| Net Requirements | | | | | |
| Planned Order Receipt | | | | | |
| Planned Order Release | | | | | |

Revised MRP

| Week | 1 | 2 | 3 | 4 | 5 |
|-----------------------|-----|---|---|---|---|
| Gross Requirements | | | | | |
| Scheduled Receipts | | | | | |
| Projected Available | 100 | | | | |
| Net Requirements | | | | | |
| Planned Order Receipt | | | | | |
| Planned Order Release | | | | | |

Problem 4.18: Its Monday morning and you have just arrived at work. Complete the following MRP record as it would appear Monday AM. Lead Time is two weeks, Lot Size is 100.

Initial MRP

| Week | 1 | 2 | 3 | 4 | 5 |
|-----------------------|-----|----|----|----|----|
| Gross Requirements | 70 | 40 | 80 | 50 | 40 |
| Scheduled Receipts | 100 | | | | |
| Projected Available | 50 | | | | |
| Net Requirements | | | | | |
| Planned Order Receipt | | | | | |
| Planned Order Release | | | | | |

During the week, the following events occur. Enter them in the MRP record.

- The planned order for 100 in week 1 is released
- Thirty of the scheduled receipts for week 1 are scrapped.
- An order for 20 is received for delivery in week 3.
- An order for 40 is received for delivery in week 6.
- The gross requirements of 70 in week 1 are issued.

MRP record at the end of week 1

| Week | 1 | 2 | 3 | 4 | 5 |
|-----------------------|---|---|---|---|---|
| Gross Requirements | | | | | |
| Scheduled Receipts | | | | | |
| Projected Available | | | | | |
| Net Requirements | | | | | |
| Planned Order Receipt | | | | | |
| Planned Order Release | | | | | |

Beginning on Page 140 Problem 5.13 A work center has the following open and planned orders for week 4. Calculate the total standard time required (load).

| | | Order Quantity | Setup Time Hours | Run time (hrs./ piece) | Total time (hours) |
|-----------------|-----|----------------|------------------|------------------------|--------------------|
| Releases Orders | 120 | 300 | 1.00 | 0.10 | |
| | 340 | 200 | 2.50 | 0.30 | |
| Planned Orders | 560 | 300 | 3.00 | 0.25 | |
| | 780 | 500 | 2.00 | 0.15 | |

Problem 5.14 A work center has the following open and planned orders for week 4. Calculate the total standard time required (load).

| | | Order Quantity | Setup Time Hours | Run time (hrs./ piece) | Total time (hours) |
|-----------------------------|-----|----------------|------------------|------------------------|--------------------|
| Releases Orders | 125 | 150 | 0.25 | 0.10 | |
| | 345 | 50 | 0.40 | 0.05 | |
| Planned Orders | 565 | 75 | 1.00 | 0.20 | |
| | 785 | 35 | 0.50 | 0.15 | |
| Total Time (standard hours) | | | | | |

Problem 5.15 Using the information in the following route file, open order file, and MRP planned orders, calculate the load on the work center.

Routing Part 123: Set up time = 2 std hrs.
Run time per piece = 3 std hrs per piece

Part 456: Set up = 3 std hrs.
Run time per piece = 1 std hr per piece

Open orders

| Week | 1 | 2 | 3 |
|------|----|---|---|
| 123 | 12 | 8 | 5 |
| 456 | 15 | 5 | 5 |

Planned Orders for parts

| Week | 1 | 2 | 3 |
|------|---|----|----|
| 123 | 0 | 50 | 10 |
| 456 | 0 | 10 | 15 |

Load report

| Week | | 1 | 2 | 3 |
|-----------------|-----|---|---|---|
| Releases Orders | 123 | | | |
| | 456 | | | |
| Planned Orders | 123 | | | |
| | 456 | | | |
| Total Load | | | | |

Problem 5.16 Complete the following load report and suggest possible courses of action.

| | | | | | |
|-----------------|-----|-----|----|----|-------|
| Week | 18 | 19 | 20 | 21 | Total |
| Releases Orders | 145 | 155 | 90 | 60 | 450 |
| Planned Orders | 0 | 0 | 80 | 80 | 160 |
| Total Load | | | | | |
| Rated Capacity | | | | | |
| (Over)/Under | | | | | |

Problem 5.17: Back schedule the following shop order. All times are given in days. Move time between operations is one day, and wait time is one day. Due date is day 200. Assume orders start at the beginning of a day and finish at the end of a day.

| Operation Number | Work Center | Operation Time (days) | Queue Time (days) | Arrival Date | Finish Date |
|------------------|-------------|-----------------------|-------------------|--------------|-------------|
| 10 | 111 | 2 | 3 | | |
| 20 | 130 | 4 | 5 | | |
| 30 | 155 | 1 | 2 | | |
| | Stores | | | 150 | |

Problem 5.18: Back schedule the following. Move time between operations is one day, and wait time is one day. Due date is day 200. Assume orders start at the beginning of a day and finish at the end of a day.

| Operation Number | Work Center | Operation Time (days) | Queue Time (days) | Arrival Date | Finish Date |
|------------------|-------------|-----------------------|-------------------|--------------|-------------|
| 10 | 111 | | | | |
| 20 | 130 | | | | |
| 30 | 155 | | | | |
| | Stores | | | 200 | |

Beginning on Page 176 Problem 6.16 Complete the following input/output report. What are the planned and actual backlogs at the end of period 4?

| | | | | | |
|---------------------|----|----|----|----|-------|
| Period | 1 | 2 | 3 | 4 | Total |
| Planned Input | 35 | 37 | 36 | 41 | |
| Actual input | 33 | 33 | 31 | 43 | |
| Cumulative Variance | | | | | |

| | | | | | |
|---------------------|----|----|----|----|--|
| Planned Output | 40 | 40 | 40 | 40 | |
| Actual Output | 39 | 35 | 40 | 38 | |
| Cumulative Variance | | | | | |

| | | | | | |
|-----------------|----|--|--|--|--|
| Planned Backlog | 32 | | | | |
| Actual Backlog | 32 | | | | |

Problem 6.17: Complete the following input/output report. What is the backlog at the end of period 5?

| | | | | | | |
|---------------------|----|----|----|----|----|-------|
| Period | 1 | 2 | 3 | 4 | 5 | Total |
| Planned Input | 78 | 78 | 78 | 78 | 78 | |
| Actual input | 82 | 80 | 74 | 82 | 84 | |
| Cumulative Variance | | | | | | |

| | | | | | | |
|---------------------|----|----|----|----|----|--|
| Planned Output | 80 | 80 | 80 | 80 | 80 | |
| Actual Output | 87 | 83 | 74 | 80 | 84 | |
| Cumulative Variance | | | | | | |

| | | | | | | |
|-----------------|----|--|--|--|--|--|
| Planned Backlog | 45 | | | | | |
| Actual Backlog | 45 | | | | | |

Problem 6.18 Complete the following table to determine the run sequence for each of the sequencing rules.

| Job | Process Time | Arrival Date | Due Date | Operation Due Date | Sequencing Rule | | | |
|-----|--------------|--------------|----------|--------------------|-----------------|-----|-----|-----|
| | | | | | FCFS | EDD | ODD | SPT |
| A | 5 | 123 | 142 | 133 | | | | |
| B | 2 | 124 | 144 | 131 | | | | |
| C | 3 | 131 | 140 | 129 | | | | |

Problem 6.19: Jobs A, B, and C are in queue at work center 10 then to 20. There is no move time, today is day 1. If the jobs are scheduled by the earliest due date can they be completed on time?

| Job | Process Time (days) | | Due Date |
|-----|---------------------|----------------|----------|
| | Work Center 10 | Work Center 20 | |
| A | 7 | 3 | 12 |
| B | 5 | 2 | 24 |
| C | 9 | 4 | 18 |

| Job | Work Center 10 | | Work Center 20 | |
|-----|----------------|--|----------------|----------|
| | | | Start Day | Stop Day |
| A | | | | |
| B | | | | |
| C | | | | |

Beginning on Page 225 Problem 8.2: Calculate the three-month moving average forecasts for months 4, 5, 6, and 7.

| Month | Actual Demand | Forecast |
|-------|---------------|----------|
| 1 | 67 | |
| 2 | 75 | |
| 3 | 43 | |
| 4 | 50 | |
| 5 | 77 | |
| 6 | 65 | |
| 7 | | |
| | | |

Problem 8.2: Use the following demand data to:

- a. Graph the demand
- b. What is your best guess for month 11?
- c. Using a three-month moving average calculate the forecasts for months 4, 5, 6, 7, 8, 9, 10, and 11.

| Month | Actual Demand | Forecast |
|-------|---------------|----------|
| 1 | 102 | |
| 2 | 91 | |
| 3 | 95 | |
| 4 | 105 | |
| 5 | 94 | |
| 6 | 100 | |
| 7 | 109 | |
| 8 | 92 | |
| 9 | 101 | |
| 10 | 98 | |
| 11 | | |

Problem 8.6: Using exponential smoothing, calculate the forecasts for months 2, 3, 4, 5, and 6. The smoothing constant is 0.2 and the old forecast for month 1 is 245.

| Month | Actual Demand | Forecast |
|-------|---------------|----------|
| 1 | 260 | |
| 2 | 230 | |
| 3 | 225 | |
| 4 | 245 | |
| 5 | 250 | |
| 6 | | |

Problem 8.7: Using exponential smoothing, calculate the forecasts for months 2, 3, 4, 5, and 6. The old average for month 3 was 96 and the smoothing constant is 0.2. What is the difference between the two forecasts for month 11?

| Month | Actual Demand | Forecast |
|-------|---------------|----------|
| 1 | 102 | |
| 2 | 91 | |
| 3 | 95 | 96 |
| 4 | 105 | |
| 5 | 94 | |
| 6 | 100 | |
| 7 | 109 | |
| 8 | 92 | |
| 9 | 101 | |
| 10 | 98 | |
| 11 | | |

Problem 8.8: Weekly demand for an item averaged 100 units over the past year. Actual demand for the next eight weeks is shown in what follows:

- Plot the graph.
- Letting $\alpha = 0.25$ calculate the smoothed forecast for each week.
- Comment on how well the forecast is tracking actual demand. Is it lagging or leading actual demand?

| Month | Actual Demand | Forecast |
|-------|---------------|----------|
| 1 | 103 | |
| 2 | 112 | |
| 3 | 113 | |
| 4 | 120 | |
| 5 | 126 | |
| 6 | 128 | |
| 7 | 138 | |
| 8 | 141 | |
| 9 | | |

Problem 8.17: The Fast Track Ski Shoppe sells ski goggles during the four months of the ski season. Average demand follows:

- Calculate the deseasonalized sales and the seasonal index for each of the four months.
- If next year's demand is forecast at 1200 Pairs of goggles, what will be the forecast sales for each month?

| Month | Average Past Demand | Seasonal Index | Forecast Demand Next Year |
|----------|---------------------|----------------|---------------------------|
| December | 300 | | |
| January | 400 | | |
| February | 150 | | |
| March | 150 | | |
| Total | | | |

Problem 8.18: Calculate the mean absolute deviation.

| Period | Forecast | Actual Demand | Absolute Deviation |
|--------|----------|---------------|--------------------|
| 1 | 100 | 85 | |
| 2 | 100 | 105 | |
| 3 | 100 | 120 | |
| 4 | 100 | 100 | |
| 5 | 100 | 90 | |
| Total | | | |

Problem 8.19: Calculate the mean absolute deviation.

| Period | Forecast | Actual Demand | Absolute Deviation |
|--------|----------|---------------|--------------------|
| 1 | 100 | 105 | |
| 2 | 105 | 95 | |
| 3 | 110 | 90 | |
| 4 | 115 | 135 | |
| 5 | 120 | 105 | |
| 6 | 125 | 120 | |
| Total | 675 | 650 | |

Problem 8.20: A company uses a tracking signal trigger of ± 4 to decide whether a forecast should be reviewed. Given the following history, determine in which period the forecast should be reviewed. MAD for the item is 15. Is there any indication that the forecast should be revised?

| Period | Forecast | Actual | Deviation | Cumulative Deviation | Tracking Signal |
|--------|----------|--------|-----------|----------------------|-----------------|
| 1 | 100 | 110 | | | |
| 2 | 105 | 90 | | | |
| 3 | 110 | 85 | | | |
| 4 | 115 | 110 | | | |
| 5 | 120 | 105 | | | |
| 6 | 125 | 95 | | | |

Beginning on Page 251 Problem 9.7: A company manufactures and sells a seasonal product. Based on the sales forecast that follows, calculate a level production plan, quarterly ending inventories, and average quarterly inventories. Assume that the average quarterly inventory is the average of the starting and ending inventory for the quarter. If inventory carrying costs are \$3 per unit per quarter, what is the annual cost of carrying this anticipation inventory? Opening and closing inventories are zero.

| | Quarter 1 | Quarter 2 | Quarter 3 | Quarter 4 | Totals \$ |
|-------------------|-----------|-----------|-----------|-----------|-----------|
| Sales | 1000 | 2000 | 3000 | 2000 | |
| Production | | | | | |
| Ending Inventory | | | | | |
| Average Inventory | | | | | |
| Inventory Cost | | | | | |
| | | | | | |

Problem 9.8: Given the following data, calculate a level production plan, quarterly ending inventory, and average quarterly inventory. If inventory carrying costs are \$6 per unit per quarter, what is the annual carrying cost? Opening and closing inventories are zero.

| | Quarter 1 | Quarter 2 | Quarter 3 | Quarter 4 | Totals \$ |
|-------------------|-----------|-----------|-----------|-----------|-----------|
| Sales | 5000 | 8000 | 8000 | 10000 | |
| Production | | | | | |
| Ending Inventory | | | | | |
| Average Inventory | | | | | |
| Inventory Cost | | | | | |
| | | | | | |

Problem 9.9: Given the following data, calculate a level production plan, quarterly ending inventory, and average quarterly inventory. If inventory carrying costs are \$3 per unit per quarter, what is the annual carrying cost? Opening and closing inventories are zero.

| | Quarter 1 | Quarter 2 | Quarter 3 | Quarter 4 | Totals \$ |
|-------------------|-----------|-----------|-----------|-----------|-----------|
| Sales | 3000 | 4000 | 7000 | 6000 | |
| Production | | | | | |
| Ending Inventory | | | | | |
| Average Inventory | | | | | |
| Inventory Cost | | | | | |
| | | | | | |

Problem 9.17: Over the past year, a company has sold the following ten items. The following table shows the annual sales in units and the cost of each item.

- (a) Calculate the annual dollar usage of each item.
- (b) List the items according to their total annual dollar usage.
- (c) Calculate the cumulative annual dollar usage and the cumulative percentage of items.
- (d) Group the items into A, B, and C groups based on percentage of annual dollar usage.

| Part Number | Annual Unit Usage | Unit Cost \$ | Annual Cost \$ |
|-------------|-------------------|--------------|----------------|
| 1 | 21,000 | 1 | |
| 2 | 5000 | 40 | |
| 3 | 1600 | 3 | |
| 4 | 12,000 | 1 | |
| 5 | 1000 | 100 | |
| 6 | 50 | 50 | |
| 7 | 800 | 2 | |
| 8 | 10,000 | 3 | |
| 9 | 4000 | 1 | |
| 10 | 5000 | 1 | |

Problem 9.18: Analyze the following data to produce an ABC classification based on annual dollar usage.

| Part Number | Annual Unit Usage | Unit Cost \$ | Annual Cost \$ |
|-------------|-------------------|--------------|----------------|
| 1 | 200 | 10 | |
| 2 | 15,000 | 4 | |
| 3 | 60,000 | 6 | |
| 4 | 15,000 | 15 | |
| 5 | 1400 | 10 | |
| 6 | 100 | 50 | |
| 7 | 25,000 | 2 | |
| 8 | 700 | 3 | |
| 9 | 25,000 | 1 | |
| 10 | 7500 | 1 | |

Beginning on Page 300 Problem 11.3: Given the following data, calculate the average (\bar{x}) of the distribution and the standard deviation (σ).

| Period | Actual Demand | Deviation | Deviation Squared |
|--------|---------------|-----------|-------------------|
| 1 | 500 | | |
| 2 | 600 | | |
| 3 | 425 | | |
| 4 | 450 | | |
| 5 | 600 | | |
| 6 | 575 | | |
| 7 | 375 | | |
| 8 | 475 | | |
| 9 | 525 | | |
| 10 | 475 | | |
| Total | | | |

Problem 11.4: Given the following data, calculate the average (\bar{x}) demand and the standard deviation (σ) about the average.

| Period | Actual Demand | Deviation | Deviation Squared |
|--------|---------------|-----------|-------------------|
| 1 | 1700 | | |
| 2 | 2100 | | |
| 3 | 1900 | | |
| 4 | 2200 | | |
| 5 | 2000 | | |
| 6 | 1800 | | |
| 7 | 2100 | | |
| 8 | 2300 | | |
| 9 | 2100 | | |
| 10 | 1800 | | |
| Total | | | |

Problem 11.15: Management has stated that it will tolerate one stock out per year. The forecast of annual demand for a particular SKU is 100,000 units, and it is ordered in quantities of 10,000 units. The lead time is two weeks. Sales history for the past ten weeks follows. Calculate:

- a. Sigma for the history time interval.
- b. Sigma for the lead time interval.
- c. The service level.
- d. The safety stock required for this service level.
- e. The order point.

| Period | Actual Demand | Deviation | Deviation Squared |
|--------|---------------|-----------|-------------------|
| 1 | 2100 | | |
| 2 | 1700 | | |
| 3 | 2600 | | |
| 4 | 1400 | | |
| 5 | 1800 | | |
| 6 | 2300 | | |
| 7 | 2200 | | |
| 8 | 1600 | | |
| 9 | 2100 | | |
| 10 | 2200 | | |
| Total | | | |
